Current NERC Operating Manual Policy 1 Inadvertent Interchange Requirements

North American Energy Standards Board (NAESB), Inadvertent Interchange Payback Task Force (IIPTF)

The North American Energy Standards Board (NAESB), Inadvertent Interchange Payback Task Force (IIPTF) needs to review and address the applicable Inadvertent Interchange sections of the NERC Operating Manual Policy 1. The listed requirements appear to fall within the scope of NAESB. However, there may be a transition period in which both NERC and NAESB will collaborate to ensure the requirements are addressed (e.g. Inadvertent Interchange accounting).

Time error is a side effect resulting from the Inadvertent Interchange. It is the difference between the schedule interconnection frequency and the actual interconnection frequency. Time Error Correction needs to be evaluated against possible social impacts, if any. It may eventually result in a determination that Time Error Correction is not necessary or desired as a reliability requirement or as a commercial practice.

Policy 1, Inadvertent Interchange, Requirements

NERC Operating Manual Policy 1, and Appendixes requirements are listed. The proposed superceding NAESB standard, if known, is shown in the table.

Policy 1 Identification	Requirement	NAESB Standard Development Process	Requirement Status / Comment
D. Time Control Standard	Interconnection Time Error Correction		Time Error Correction – a side effect of Inadvertent may fall under NAESB and possibly under the IIPTF – evaluation is necessary
	Interconnection Time Monitor		Time Error Correction – a side effect of Inadvertent may fall under NAESB and possibly under the IIPTF

Policy 1 Identification	Requirement	NAESB Standard Development Process	Requirement Status / Comment
	Time Error Correction Off-set - Frequency Offset - Schedule Offset		Time Error Correction – a side effect of Inadvertent may fall under NAESB and possibly under the IIPTF
F. Inadvertent Interchange Standard	Inadvertent Interchange provides a measure of non-scheduled Interchange and bilaterally scheduled inadvertent payback	North American Energy Standards Board (NAESB), Inadvertent Interchange Payback Task Force (IIPTF)	
	Inadvertent Interchange Calculation	NAESB IIPTF	
	Inadvertent Interchange Accounting	NAESB IIPTF	NAESB will eventually have the accounting responsibility. The transition of Inadvertent accounting needs to be determined.
	Inadvertent Interchange Summary	NAESB IIPTF	
	Inadvertent Interchange Dispute Resolution	NAESB IIPTF	
G. Surveys Standards	Inadvertent Interchange Summary Survey - Ongoing, on a regular basis	NAESB IIPTF	NAESB will eventually have the accounting responsibility. The transition of Inadvertent accounting needs to be determined.
Appendix 1D. Time Error Correction Procedures	Time Error Correction (TEC) Specifications for “Fast” and “Slow” Adjustments		Time Error Correction – a side effect of Inadvertent may fall under NAESB and possibly under the IIPTF

Policy 1 Identification	Requirement	NAESB Standard Development Process	Requirement Status / Comment
Appendix 1F. Inadvertent Interchange Dispute Resolution Process, Error Adjustment Procedures, and On- and Off-Peak Periods	Inadvertent Dispute Resolution	NAESB IIPTF	
	Error Adjustment Resolution	NAESB IIPTF	
	On- and Off-Peak Periods <ul style="list-style-type: none"> - Monday through Sunday - Daily On-Peak Hours - Daylight Savings Time Adjustments - Holiday Determination 	NAESB IIPTF
