## RECOMMENDATION TO NAESB WGQ EXECUTIVE COMMITTEE

Requester: KeySpan Request No.: R02002 and  
2002 Annual Plan Item 10 - Order 587-N  
Recommendation 2

### STANDARDS LANGUAGE:

#### 5.1.z2 Proposed Principle

The service flexibility available to either the Releasing Shipper or the Replacement Shipper(s) for the subject capacity should not be less as a result of the recall.

#### 5.1.z3 Proposed Principle

Notice of the allocation of capacity between the Releasing Shipper, provided through the Transportation Service Provider's Customer Activities Web site, and the Replacement Shipper(s), provided for in NAESB WGQ Standard Nos. [5.3.z2] and [5.3.z3], should be provided in a manner that will permit affected parties sufficient time, as provided for in NAESB WGQ Standard No. [5.3.z1], to place nominations or take other corrective actions to avoid penalties.

#### 5.2.z1 Proposed Definition

Elapsed Prorata Capacity means that portion of the capacity that would have theoretically been available for use prior to the effective time of the intraday recall based upon a cumulative uniform hourly use of the capacity.

#### 5.3.z12 Proposed Standard

For the recall notification provided to the Transportation Service Provider (TSP), the quantity should conform to the TSP's capacity recall notification specification. The TSP should specify whether the quantity should be expressed in terms of

- a) total released capacity entitlements or
- b) adjusted total released capacity entitlements based upon the Elapsed Prorata Capacity.

The capacity entitlements resulting from the use of either a) or b) should be the same.

#### 5.3.z13 Proposed Standard

In the event of an intra-day capacity recall, the Transportation Service Provider (TSP) should determine the allocation of capacity between the Releasing Shipper and the Replacement Shipper(s) based upon the Elapsed Prorata Capacity (EPC). Variations to the use of EPC may be necessary to reflect the nature of the TSP's tariff, services, and/or operational characteristics.

#### 5.3.z14 Proposed Standard

The Transportation Service Provider should not be obligated to deliver in excess of the total daily contract quantity of the release as a result of NAESB WGQ Standard No. [5.3.z12].

#### 5.3.z15 Proposed Standard

The amount of capacity allocated to the Replacement Shipper(s) should equal the original released capacity less the recalled capacity.
