

# RECOMMENDATION TO GISB EXECUTIVE COMMITTEE

Request #: 96049

Type of Request (check all that apply) (E-5):

- A-3  New Document (Data Dictionary attached)
- A-1  New Data Element (Data Dictionary attached)
- A-6  Revision to Data Element (Data Dictionary attached)
- A-2  New Code Value (Table attached)
- A-2  Revision to Code Value (Table attached)
- Revision to Business Process Documentation
- Revision to X12
- A-4  New Business Practice Standard
- A-5  Revision to Business Practice Standard

**Abstract / Discussion (E-1, E-3, E-4):** Modify the confirmation request transaction to support a "final" transmission of data form informational purposes only. This new transaction is essentially used to report the final changes and closes the confirmation cycle being performed. Request states that this will allow NBPL [Northern Border Pipe Line, the requester] to accurately perform the confirmation cycle within the GISB defined time frame, and that all NBPL confirming parties would be required to utilize this standard.

**Applicable Documents:** Confirmation Request

**Associated Revisions:** Confirmation Response.

**Is Revision Required to Support an Existing GISB Standard? If So, State Standard Number and Language:** No.

**Applicable to Upstream/Downstream Process? No.**  
**If So, State Task Force Referred To**

**Sense of the Room Results:** \_\_\_\_\_ In Favor; \_\_\_\_\_ Opposed  
Not discussed in METF to date. May be a "one-off" type of approach as written, it is unknown if there is broader support.

**Executive Committee Sponsor:** Norm Walker.

**GISB Subcommittee/Task Force:** Market Execution Task Force.

**Requester:** Northern Border Pipeline Company

**Due Date (E-6):** 3/97

**DATA DICTIONARY  
PROPOSED REVISIONS**

**REQUEST # 96049**

**Note:** Per the request the only change to the Confirmation Request would be the addition of a transaction set purpose code indicating the “final” nature of the confirmation request and response.

Therefore the confirmation request and response would be the same with the following added data element. This data element is already an ANSI mandatory field and is contained in the X12 mapping, but it is not currently a GISB data element per the data dictionary:

| <b>Business Name</b>         | <b>Definition</b>  | <b>Usage (E-2)</b> | <b>Condition</b> |
|------------------------------|--|--------------------|------------------|
| Transaction Set Purpose Code | A 2-digit code specifying the type of transaction being sent in this transmission<br>00 = Original<br>22 = Final | M                  |                  |
|                              |  |                    |                  |

**\* Indicates Common Code**
