**Abstract / Discussion (E-1, E-3, E-4):** In the Request for Confirmation document, the usage of the Upstream Contract Identifier is business conditional (BC). In the Confirmation Response, the response dataset to the request, it's usage is also BC. This is inconsistent with the way other BC data elements are treated in their respective response documents.

The response documents should reflect the same level of information as provided in the document it is in response to. In other words, if the Upstream Contract Identifier information is provided in the confirmation request, it should be echoed back in the confirmation response. Thus, the usage in the confirmation response should be purely conditional with the condition being where the information was supplied in the original request for confirmation.

This is consistent with the way these data elements are treated in the rest of the nomination process. See related request nos. 96501 and 96053.
