Abstract / Discussion (E-1, E-3, E-4): Request asked that Gas Transaction Point data element be removed from capacity release related Notes documents as a mandatory data element as in many instances it would not be applicable in this document.

Review of implementation documentation by the group determined that this was not a mandatory data element, but rather a Sender's Option data element, and as such did not present any problems. No change to current data dictionary is necessary.

Request was voluntarily withdrawn by the requester, no further action is needed.
