Abstract / Discussion (E-1, E-3, E-4):

The Data Element Cross Reference to ASC X12 in the January 31, 1997 Transportation/Sales Invoice implementation guide lists "Assigned Line Number" as the "Segment Name/GISB Data Element Name" in the first LX segment occurrence. It has been the practice of GISB to list either the data element name or, in the case where there is no data element within a specific segment, the name of the segment in the Data Element Cross Reference. The "Assigned Line Number" is neither a GISB data element nor the name of the LX segment.

The Technical Subcommittee recommends that the "Assigned Line Number" specified in the first LX occurrence of the Data Element Cross Reference be modified to the name of the segment itself, which is "Assigned Number". No revisions are need to the data dictionary, the X12 data set, or the associated tables.
