**via email & posting**

**TO:** GISB Members, Posting on the GISB Home Page for Interested Industry Participants  
**FROM:** Rae McQuade, Executive Director  
**RE:** Request For Comments  
**DATE:** May 3, 2000

---

The GISB industry comment period begins today and ends on May 31 for the recommendations listed below. Subcommittees and task forces submitted the recommendations for your review on April 26, April 27, May 1 and May 2.

- R97064D: Modify the standards manuals to use the new X12 data sets and implement the technical changes for request nos. R99038, R98055, R99040, R98088, R98057, R97044A, R99041 which have been approved by the GISB Executive Committee and request nos. R99039, R98057, R99044 which have been ratified by the GISB membership.
- R98031 & R98035B: (EII Task Force, 11/2-4/98 -IR6, R98031 and EII Task Force 11/20/98 -IR14, R98035B) Decline the requests to:
- Develop an EDI dataset to allow Confirming Parties to elect to "Confirm by Exception" as provided for in 1.2.11 and 1.3.22, and to
  - Add new transaction identifiers in the Request for Confirmation (G850RQCF) and the Confirmation Response (G855RRFC) datasets. This transaction identifier would be used to indicate when the above datasets are being used for pre-limit quantities.
- R98085: (EII Task Force (12/2/98) -IR30) Delete GISB Standard No. 4.3.77: Where a Transportation Service Provider populates the Upstream/Downstream Identifier via its EBB/EDM implementation based upon provision of an upstream or downstream contract identifier at pooling and logical points, an EDI nomination should be provided the same capability.
- R99035: Modify the EDM Implementation Guide to support standards convergence with IETF's "HTTP Transport for Secure EDI" (EDI INT standard AS2)
- R99050: Modify the definition of the data element Tax Identification Code in the Transportation / Sales Invoice (3.4.1) and Service Requester Level Charge / Allowance Invoice (3.4.4) to "Code assigned by a government to the Payee."
- FTTF Minimum Guidelines: The guidelines are reviewed and updated by the Future Technology Task Force, at a minimum, by the spring of each year and presented to the GISB Executive Committee for adoption by the June meeting of that group.

## Gas Industry Standards Board

1100 Louisiana, Suite 4925, Houston, Texas 77002

Phone: (713) 356-0060, Fax: (713) 356-0067, E-mail: [gisb@aol.com](mailto:gisb@aol.com)

Home Page: [www.gisb.org](http://www.gisb.org)

---

The recommendations can be accessed from the GISB Web site, but are also attached to this request for comment<sup>1</sup>. All comments received by the GISB office by end of business May 31 will be posted on the Home Page and forwarded to the Executive Committee (EC) members for their consideration. The EC members will consider all comments and are scheduled to cast their votes on these recommendations on June 15 at the EC meeting at the offices of Boeing in Seattle, Washington. If you have difficulty retrieving this document, please call the GISB office at (713) 356-0060.

Best Regards,

*Rae McQuade*

<sup>1</sup> All recommendations other than clarifications can be found on the "Request For Standards" page (<http://www.gisb.org/req.htm>) which is accessible from the GISB main page. Clarifications (Cxxxxx) can be found on the "Clarification Requests" page (<http://www.gisb.org/clar.htm>).

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Texaco**

**Request No.: R97064 - D**

**1. Recommended Action:**

- Accept as requested
- Accept as modified below
- Decline

**Effect of EC Vote to Accept Recommended Action:**

- Change to Existing Practice
- Status Quo

**2. TYPE OF MAINTENANCE**

**Per Request:**

- Initiation
- Modification
- Interpretation
- Withdrawal
  
- Principle (x.1.z)
- Definition (x.2.z)
- Business Practice Standard (x.3.z)
- Document (x.4.z)
- Data Element (x.4.z)
- Code Value (x.4.z)
- X12 Implementation Guide
- Business Process Documentation

**Per Recommendation:**

- Initiation
- Modification
- Interpretation
- Withdrawal
  
- Principle (x.1.z)
- Definition (x.2.z)
- Business Practice Standard (x.3.z)
- Document (x.4.z)
- Data Element (x.4.z)
- Code Value (x.4.z)
- X12 Implementation Guide
- Business Process Documentation

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Texaco**

**Request No.: R97064 - D**

**3. RECOMMENDATION**

**BUSINESS PROCESS DOCUMENTATION** (for addition, modification or deletion of business process documentation language)

**Standards Book:** Nominations Related Standards

Flowing Gas Related Standards

Invoicing Related Standards

Electronic Delivery Mechanism Related Standards

Capacity Release Related Standards

**Related Standards tab**

In the "Hypertext Transfer Protocol (HTTP)" section, for the "HTTP transaction-set Code Values" table, make the following modifications:

For the row where the GISB Standard Number column = 1.4.1, change the "HTTP transaction-set Code Values" column from "G850NMST" to "G873NMST";

For the row where the GISB Standard Number column = 1.4.3, change the "HTTP transaction-set Code Values" column from "G850RQCF" to "G873RQCF";

For the row where the GISB Standard Number column = 1.4.4, change the "HTTP transaction-set Code Values" column from "G855RRFC" to "G873RRFC";

For the row where the GISB Standard Number column = 1.4.5, change the "HTTP transaction-set Code Values" column from "G865SQTS" to "G873SQTS";

For the row where the GISB Standard Number column = 1.4.6, change the "HTTP transaction-set Code Values" column from "G865SQOP" to "G873SQOP"

**Standards Book:** Electronic Delivery Mechanism Related Standards

**Data Dictionary for Internet EDM**

For the "transaction-set" data element, in the "Format" column, change "G850NMST" to "G873NMST"; delete "G855NMQR", and change "G850RQCF" to "G873RQCF"

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Texaco      Request No.: R97064 - D**

**TECHNICAL CHANGE LOG** (all instructions to accomplish the recommendation)

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Texaco**

**Request No.: R97064 - D**

**4. SUPPORTING DOCUMENTATION**

**a. Description of Request:**

See original request to update GISB Implementation Guides to be ANSI compliant.

**b. Description of Recommendation:**

**Technical Subcommittee**

New 873 transaction set designed at the following meetings: 05/27/1998, 06/30/1998, 01/11/1999, 02/01/1999, and 05/14/1999

Nomination, Request for Confirmation, Confirmation Response, Scheduled Quantity, and Scheduled Quantity for Operator mapped to new 873 transaction set at the following meetings: 03/10/2000, 03/24/2000, 04/06-07/2000, 04/19/2000

**Sense of the Room:** April 19, 2000   3   In Favor   0   Opposed

**Segment Check** (if applicable):

In Favor:    End-Users    LDCs    Pipelines    Producers    Services

Opposed :    End-Users    LDCs    Pipelines    Producers    Services

**c. Business Purpose:**

To create ANSI Compliant Nomination, Request for Confirmation, Confirmation Response, Scheduled Quantity and Scheduled Quantity for Operator EDI Transaction Sets.

**d. Commentary/Rationale of Subcommittee(s)/Task Force(s):**

## SAMPLE ASC X12 TRANSACTION

### EDI example information

In the EDI implementation, a group of nomination line items may be bundled into a single transaction set. This bundle is assigned a nomination number by the nomination originator. The nomination number is transmitted in the header portion of the EDI transaction set. The processor of the nomination (transportation service provider) uses this number in the corresponding Quick Response transaction to identify which bundle of nomination line items are being responded to.

**Usage:**

- M1 [When sending one quantity and LQ01 = 'QT'/LQ02 = 'R', send Quantity in the upstream N1 loop \(N101 = 'US'\).](#)

When sending one quantity and LQ01 = 'QT'/LQ02 = 'D', send Quantity in the downstream N1 loop (N101 = 'DW').

When sending two quantities, send Quantity in the upstream N1 loop (N101 = 'US') and send Delivered Quantity in the downstream N1 loop (N101 = 'DW').

MA1 When sending two quantities, send Quantity in the upstream N1 loop (N101 = 'US') and send Delivered Quantity in the downstream N1 loop (N101 = 'DW').

MA2 This element may only be used in the downstream N1 loop (N101 = 'DW').

MA3 This element may only be used in the upstream N1 loop (N101 = 'US').

### N1 Segments (Sub-detail)

Element Name (N104)	Usage when PO109 =				N101	N103	N103 Description
	'P'	'N'	'T'	'U'			
Downstream Identifier Code	M	C	NU	C	DW	1	D-U-N-S Number, Dun & Bradstreet
Receipt Location/Receipt Location-Proprietary Code	M	C	M	C	M2	29 ZY	GISB/PI Data Reference Number (see n1) Transportation Service Provider's proprietary code (see n1)
Delivery Location/Delivery Location-Proprietary Code	M	C	M	C	MQ	29 ZY	GISB/PI Data Reference Number (see n1) Transportation Service Provider's proprietary code (see n1)
Upstream Identifier Code	M	C	NU	C	US	1	D-U-N-S Number, Dun & Bradstreet

#### Notes:

n1 When a Transportation Service Provider's proprietary location code is employed pursuant to this standard, the parties agree that nominations, confirmations, scheduled quantities, and capacity release documents employing such code should be for one gas day at a time, and used only until there is a verified common code for the point associated with the proprietary location code. This would include daily nominations over a weekend. Within two months following the availability of the location the parties should employ the common code and no longer employ the proprietary code for identifying such location in the datasets related to the identified standards.

**Notes:**

n1 This data element communicates the Reduction Reason codes pertaining to the Location level. When the Reduction Reason code is present at both the detail and sub-detail levels, the sub-detail code overrides the detail code.

DRAFT DRAFT DRAFT DRAFT DRAFT

**N1 Segments (Detail)**

Element Name (N104)	Usage	N101	N103	N103-Description
Location/Location Proprietary Code	M	MQ	29 ZY	GISB/PI Data Reference Number (see n1) Transportation Service Provider's proprietary code (see n1)
Confirmation Service Identifier Code	C	B2	4	D-U-N-S Number, Dun & Bradstreet

**Notes:**

n1 — When a Transportation Service Provider's proprietary code is employed pursuant to this standard, the parties agree that nominations, confirmations, scheduled quantities, and capacity release documents employing such code should be for one gas day at a time, and used only until there is a verified common code for the point associated with the proprietary location code. This would include daily nominations over a weekend. Within two months following the availability of the location the parties should employ the common code and no longer employ the proprietary code for identifying such location in the datasets related to the identified standards.

**SI 1000/234 Pairs (Sub-detail)**

Element Name	Usage	Elem 1000	Elem 234	Elem 234-Description
Contractual Flow Indicator	M	CF	R D	Receipt Delivery
Solicited/Unsolicited Indicator	M	SU	S U	Solicited Unsolicited
Service Requester Contract	MA	CR		Service Requester Contract ID
Downstream Contract Identifier	BC1	DK		Downstream Contract ID
Upstream Contract Identifier	BC2	UK		Upstream Contract ID
Package ID	MA	PG		Package ID
Downstream Package ID	MA1	DP		Downstream Package ID
Upstream Package ID	MA2	UP		Upstream Package ID
Associated Contract	C	AK		Associated Contract ID
Delivery Rank (Priority)	MA1	R3		Delivery Rank (Priority)

Receipt Scheduling Status	MA	MA	MA	MA	RS	CAL CON NOM SCH	Capacity Allocated Confirmed Nominated Scheduled
Delivery Scheduling Status	MA	MA	MA	MA	DS	CAL CON NOM SCH	Capacity Allocated Confirmed Nominated Scheduled

**Usage:**

MA1 — This element will only be used when a Receipt Location or Receipt Location Proprietary Code is present (N101 = 'M2').

MA2 — This element will only be used when a Delivery Location or Delivery Location Proprietary Code is present (N101 = 'MQ').

**Notes:**

n1 — These data elements, with the exception of Reduction Reason, are not needed when the Nominator's Tracking ID is used. Reduction Reason (Elem 1000 = "RR") is mandatory in all cases.

n2 — This Reduction Reason should be sent to provide "Notice to Bumped Parties" pursuant to Standards 1.3.2.ii and 1.3.2.iii.

n3 — Per Standard 1.3.22.iv, one of these Reduction Reasons should be sent if there is no response to a Request for Confirmation or an unsolicited Confirmation Response.

n4 — If the receiver does not accept multiple Reduction Reasons, only the first occurrence of the Reduction Reason sent (Elem 1000 = "RR") will be utilized. Since sending multiple Reduction Reasons is a mutually agreed practice, any additional occurrences of the Reduction Reason sent (Elem 1000 = "RX") may be discarded. There may be a total of five Reduction Reasons sent (one in Elem 1000 = "RR" and up to four in Elem 1000 = "RX").

**SI-1000/234 Pairs LQ Segments (Sub-detail)**

see n1

**Notes:**

- n1 These data elements, with the exception of Reduction Reason, are not needed when the Nominator's Tracking ID is used. Reduction Reason ([Elem 1000 where LQ01 = "RRRED"](#)) is mandatory in all cases.
- n2 This Reduction Reason should be sent to provide "Notice to Bumped Parties" pursuant to Standards 1.3.2.ii and 1.3.2.iii.
- n3 Per Standard 1.3.22.iv, one of these Reduction Reasons should be sent if there is no response to a Request for Confirmation or an unsolicited Confirmation Response.
- n4 If the receiver does not accept multiple Reduction Reasons, only the first occurrence of the Reduction Reason sent ([Elem 1000 where LQ01 = "RRRED"](#)) will be utilized. Since sending multiple Reduction Reasons is a mutually agreed practice, any additional occurrences of the Reduction Reason sent ([Elem 1000 where LQ01 = "RXREE"](#)) may be discarded. There may be a total of five Reduction Reasons sent (one in [Elem 1000 where LQ01 = "RRRED"](#) and up to four in [Elem 1000 where LQ01 = "RXREE"](#)).

# 873 Commodity Movement Services

Functional Group ID=**CU**

## Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Commodity Movement Services Transaction Set (873) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to convey request and response information for commodity movement services. This transaction is not to be used for product sales or purchases.

# 873 Commodity Movement Services

Functional Group ID=**CU**

## Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Commodity Movement Services Transaction Set (873) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to convey request and response information for commodity movement services. This transaction is not to be used for product sales or purchases.

# 873 Commodity Movement Services

Functional Group ID=**CU**

## Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Commodity Movement Services Transaction Set (873) for use within the context of an Electronic Data Interchange (EDI) environment. This standard can be used to convey request and response information for commodity movement services. This transaction is not to be used for product sales or purchases.

**3. RECOMMENDATION**

**SUMMARY:** \* EII Task Force (11/2-4/98) –IR6. (R98031)  
 \* EII Task Force (11/20/98) –IR14. (R98035B)  
 \* No changes recommended. This request was declined by BPS on February 24, 2000.

**TECHNICAL CHANGE LOG** (all instructions to accomplish the recommendation)

<b>Description of Change:</b>
No Technical Changes required

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Tennessee Gas Pipeline  
ANR Pipeline**

**Request No.: R98031  
R98035B**

**4. SUPPORTING DOCUMENTATION**

**a. Description of Request:**

R98031: Develop an EDI dataset to allow Confirming Parties to elect to "Confirm by Exception" as provided for in 1.2.11 and 1.3.22. This would be classified as a "new transaction."

R98035B: ANR requests new transaction identifiers in the Request for Confirmation (G850RQCF) and the Confirmation Response (G855RRFC) datasets. This transaction identifier would be used to indicate when the above datasets are being used for pre-limit quantities.

Request for Confirmation (G850RQCF)  
BEG02 segment Purchase Order Type Code  
Add: Transaction Identifier Pre-Limit Quantities

Confirmation Response (G855RRFC)  
BAK01 segment Transaction Set Purpose Code  
Add: Transaction Identifier Pre-Limit Quantities

The above Transaction Identifiers would be Mutually Agreed. No additional data elements are required for the above datasets to accommodate pre-limit quantities.

**b. Description of Recommendation:**

**EBB-Internet Implementation Task Force** (November 2 - 4, 1998)

R98031: Ms. Langston described the request, and asked that the confirmation by exception function ("CBE") be supported both through EBB/EDM and EDI/EDM. Pipelines may implement this function differently.

The request described the development of an EDI dataset to allow Confirming Parties to elect to "Confirm by Exception" as provided for in GISB Standard No. 1.2.11 and 1.3.22. This would be classified as a "new transaction." The purpose of this data set is to provide the Confirming Parties using EDI the ability to agree to Confirmation by Exception. As stated in 1.2.11, "Confirmation by Exception (CBE) means that the Confirming Parties agree that one party deems that all requests at a location are confirmed by the other party (the CBE party) without response communication from that party. The CBE party can take exception to the request by so informing the other party within a mutually agreed upon time frame." When the Confirming Parties submit the Confirmation by Exception dataset, they are advising the Confirmation Requester of their desire to be confirmed for all quantities requested. Some of the data elements for request from confirming party:

- Confirming Party (M)
- Begin Date (M)
- End Date (MA)
- Location (MA)
- All locations (MA)
- Chart-time (MA)
- Cycle 1 Intraday (MA)
- Cycle 2 Intraday (MA)
- Evening Cycle (MA)

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Tennessee Gas Pipeline  
ANR Pipeline**

**Request No.: R98031  
R98035B**

Hourlies (MA)  
All Times (MA)  
Service Requester (MA)

The above data elements allow the confirming party to specify the date the CBE is to start and they can submit an ending date if desired. If none is submitted, the CBE will remain in effect until they change it. The other data elements allow the Confirming Party to submit a CBE for a specific meter(s) for a specific time (chart-time, intraday, hourly) or combination of times as well as for a specific service requester. Should they want to submit a CBE for all locations and all times, that possibility is also included. The CBE's will be submitted for the next gas day; they cannot be submitted for an intraday for that gas day. Overlapping CBE's are allowed. Choosing CBE does not prevent the Confirming Party from submitting a Confirmation Response. The quick response back to the Confirming Party would be validation error messages: retroactive CBE's not allowed and Invalid location.

Action: 105 The data elements should accommodate confirmation by exception. If a Transportation Service Provider chooses to support confirmation by exception, the GISB standard data sets should accommodate it. The motion carried unanimously.

IR6 The request was transferred to Information Requirements Subcommittee for implementation.

**EBB-Internet Implementation Task Force** (November 20, 1998)--(IR14)

R98035: ANR requests new transaction identifiers in the Request for Confirmation (G850RQCF) and the Confirmation Response (G855RRFC) datasets. This transaction identifier would be used to indicate when the above datasets are being used for pre-limit quantities.

IR14 Instruct Information Requirements Subcommittee to accommodate the pre-limit quantities in the to be developed Confirmation By Exception dataset.

Vote: Passes unanimously.

**Information Requirements Subcommittee** (October 12 - 3, 1999)

R98035: IR split the request into 'A' (add pre-limit quantity code value to the Request for Confirmation and Confirmation Response) and 'B' (add pre-limit quantity to the yet to be developed Confirmation by Exception data set per R98031). IR will address 'A' now and put 'B' on hold until we do R98031.

In the confirmation process, the requester receives the Request For Confirmation (RFC) and sends the Confirmation Response (CR) back. The pre-limit quantity is sent to the requester in the RFC and they use it in the confirmation process. The pre-limit quantity can be set for as long as a year. The requester uses the pre-limit quantity where they do passive confirmations (i.e., confirmation by exception). Per the requester, when the RFC is used to transmit pre-limit quantities, all of the required fields in the RFC are populated. The quantity field is used for the pre-limit quantity. The requester wants an indicator in the header to show that the entire document is not being used for confirmation purposes; it is being used for setting pre-limit quantities. IR is also questioning whether this is appropriate for EDI because the information may only be transmitted once a year. The requester currently provides the ability to submit on-line.

**MOTION:**

Send the following issues to BPS:

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Tennessee Gas Pipeline  
ANR Pipeline**

**Request No.: R98031  
R98035B**

1. How does the pre-limit quantity differ from a confirmation quantity that is sent for a date range, where the date range is longer than a confirmation cycle? (See Interpretation 7.3.26)
2. In light of its infrequent use, should the pre-limit quantity be included in an EDI transaction set?
3. If the pre-limit quantity is included in an EDI transaction set, should we add a GISB data element in the Request For Confirmation for the ANSI data element 'purchase order type code' (BEG02)? If so, the code value descriptions could be 'Request for Confirmation' and 'Pre-limit Quantity'.
4. If the pre-limit quantity is included in an EDI transaction set, should we add a GISB data element in the Confirmation Response for the ANSI data element 'transaction set purpose code' (BAK01)? If so, the code value descriptions could be 'Confirmation Response' and 'Pre-limit Quantity Response'.

**Sense of the Room:** October 12 - 13, 1999      6   In Favor      0   Opposed

**Information Requirements Subcommittee** (January 10 - 12, 2000)

**Discussion:** A draft data dictionary for the Confirmation by Exception Election transaction set was presented by Jim Keisler. This draft data dictionary was reviewed and changes were made.

The question arose as to the usage of the Confirmation by Exception Election transaction set. If IR creates a new transaction set for Confirmation by Exception Election, then if pipelines perform confirmations by exception, are they required to utilize this new transaction set?

**Potential Questions to Business Practices Subcommittee:**

- 1) Is the business practice of turning the confirmation by exception on/off election via an EBB used widely and frequently enough to justify an EDI implementation?
- 2) If an EDI implementation is necessary, then is the sending of the confirmation by exception on/off election a mutually agreed business practice?

**Questions to Business Practices Subcommittee regarding R98031:**

**Standard # 105** states: "The data elements should accommodate confirmation by exception. If a Transportation Service Provider chooses to support confirmation by exception, the GISB standard data sets should accommodate it."

In regards to **Standard #105**, an analysis by Information Requirements of the current Confirmation transaction sets indicates that those transaction sets do accommodate the business practice of confirmation by exception. However, IR has the following question:

Is the business practice of sending the election to initiate or terminate confirmation by exception suitable for EDI?

**Motion:** Send this question to the Business Practices Subcommittee.

**Sense of the Room:**            9 In favor            1 Opposed

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Tennessee Gas Pipeline  
ANR Pipeline**

**Request No.: R98031  
R98035B**

**Questions to Business Practices Subcommittee regarding R98035B:**

The Business Practices Subcommittee (BPS) at their November 18, 1999 meeting declined **R98035A**. BPS decided that the business practice of sending pre-limit quantities should not be standardized. IR noted in its November 2, 1999 memo that pre-limit quantities are sent infrequently. EII, however, indicated that a pre-limit quantity should be accommodated in the to be developed Confirmation by Exception Election data set.

Since BPS indicated in its response to **R98035A** that pre-limit quantities should not be standardized, should IR address pre-limit quantities pursuant to **R98035B**?

Note: Pursuant to instructions from EII, IR is processing **R98035B** in conjunction with **R98031**.

**Motion:** Send this question to the Business Practices Subcommittee.

**Sense of the Room:**            6 In favor            0 Opposed

**Business Practices Subcommittee** (February 17, 2000)

The IR questions were presented. Mr. Keisler further explained the issues and responded to questions from the group. Mr. Lander asked if anyone remembered the discussion and/or additional details regarding the discussion of this request at the EBB Internet Implementation Task Force (EIITF). Mr. Keisler noted that he did not remember any detailed discussion, that it was passed to IR with little discussion. Others who had attended the EIITF meetings agreed with this assessment. Mr. Griffith noted that he did not believe that this practice required a dataset, and that it was both infrequent and could be handled between the parties in the trading partner agreement. Mr. Lander voiced his agreement for this approach and while this item was only up for discussion (and not vote), noted that he would propose that BPS decline the request. This would therefore not require development of a standardized EDI dataset. He noted there seemed to be no need to standardize the process of election of confirmation by exception (CBE), therefore there was no need for a standardized dataset. No one on the phone cried out for the need for such a dataset and had no stated objection to the proposals.

Mr. Aschbrenner noted that in EIITF many pipelines submitted requests since they were currently providing services on their EBBs, thus they wanted to make sure they submitted requests for datasets, whether they really believed there was a compelling need for the datasets or not.

Ms. LeCureaux, representing one of the requesters, had no objection to the proposed declining of this request.

Mr. Lander noted that no one objected to the declination of the request but noted that it should not be dispositive of a similar request in the future.

Mr. Keisler asked whether the proposed disposition would also apply to IR's second question, that is, would it also decline R98035B?

Mr. Lander noted that it was his assumption that both would be declined and whatever language adopted by the BPS should be precise in accomplishing this. There was no disagreement voiced.

It will be put on the next agenda for discussion and possible vote.

**Business Practices Subcommittee** (February 24, 2000)

**Motion** BPS recommends that request numbers R98031 and R98035B be declined.

**Discussion** Mr. Scheel asked some questions regarding whether a pre-limit quantity could be accommodated on a mutually agreeable basis. Others believed that Mr. Scheel's point was moot given that

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Tennessee Gas Pipeline  
ANR Pipeline**

**Request No.: R98031  
R98035B**

R98035A, which dealt specifically with pre-limit quantities had already been dealt with. These instant requests dealt with its use in Confirmation by Exception dataset and/or standardizing its use in EDI. Discussion ended, a vote was taken.

**Action** The motion passed unanimously. See voting record for specifics.

- Document (x.4.z)
- Data Element (x.4.z)
- Code Value (x.4.z)
- X12 Implementation Guide
- Business Process Documentation

## 3. RECOMMENDATION

**SUMMARY:** \* EII Task Force (12/2/98) –IR30.  
 \* Delete GISB Standard No. 4.3.77.

### STANDARDS LANGUAGE:

**GISB Standard No. 4.3.77:** ~~Where a Transportation Service Provider populates the Upstream/Downstream Identifier via its EBB/EDM implementation based upon provision of an upstream or downstream contract identifier at pooling and logical points, an EDI nomination should be provided the same capability.~~

### TECHNICAL CHANGE LOG (all instructions to accomplish the recommendation)

<b>Description of Change:</b>
No Technical Changes required.

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Tennessee Gas Pipeline**

**Request No.: R98085**

**4. SUPPORTING DOCUMENTATION**

**a. Description of Request:**

Revise the Nomination to accommodate the sending of the Upstream/Downstream Cocontract Identifier without sending the Upstream/Downstream Identifier Code at pooling and logical points.

**b. Description of Recommendation:**

**EBB-Internet Implementation Task Force**

After discussion on the request from Enron Capital and Trade, a proposed standard and an instruction were crafted:

s76 Where a Transportation Service Provider populates the Upstream/Downstream Identifier via its EBB/EDM implementation based upon provision of an upstream or downstream contract identifier at pooling and logical points, an EDI nomination should be provided the same capability.

IR30 Instruct IR to change the usage codes of the Upstream Identifier Code\* and Downstream Identifier Code\* from Conditional (C) to Business Conditional (BC). IR should craft a revised Condition based upon s76.

**Sense of the Room:** December 2, 1998 16 In Favor 3 Opposed

**Segment Check** (if applicable):

In Favor:    End-Users   1 LDCs   7 Pipelines   2 Producers   6 Services

Opposed :    End-Users    LDCs   3 Pipelines    Producers Services

**Information Requirements Subcommittee** (November 9 - 10, 1999)

**Discussion:** Per Kim Van Pelt (co-chair of ANSI subcommittee), the new Nomination data set that was approved by ANSI is set up so that a contract number cannot be sent unless a party is present. The new transaction set was submitted to ANSI approximately one year ago and will be published in December 1999. The data is in a looping structure. The upstream/downstream party initiates a loop, with all of the related data under that party (e.g., Package ID, ranks, upstream/downstream contract). The upstream/downstream party is the only information that is mandatory at that level. None of the other data is required, and therefore it is anchored by the party information.

It was noted that the request only applies to pooling and logical points, where the point is located on a single TSP's system. This does not apply at an interconnect between two TSPs.

**MOTION:**

**Send the following issue to BPS:**

Was the intention to change the existing Usage and Condition of the Downstream Identifier Code and Upstream Identifier Code if the circumstance in s76 (GISB Standard No. 4.3.77) is not applicable (i.e., the point is not a logical or pooling point). That is, do the existing Usage and Condition no longer apply to physical points?

## RECOMMENDATION TO GISB EXECUTIVE COMMITTEE

**Requester: Tennessee Gas Pipeline**

**Request No.: R98085**

The current Condition is based upon both Model Type and whether the location is a receipt or a delivery. Therefore, the underlying usage is 'Mandatory'. Was the intent to change this underlying 'Mandatory' usage to 'Business Conditional'?

**Sense of the Room:** November 9 - 10, 1999 7 In Favor; 0 Opposed

### **Business Practices Subcommittee** (January 20, 2000)

The IR questions were presented. Ms. Van Pelt expressed some dismay with EIITF's instructions, noting that she considered it a minor comparability issue, not in wide usage, and that it had significant implications to the structure and usage of many data elements in the Nomination dataset.

Mr. Griffith added that the change to the conditionality and "reverse comparability" issues these instructions presented were not warranted based on the limited benefits gained by the request.

Mr. Lander added his general agreement with the opinions expressed and asked whether the proposed standard in the instructions, S76, had been adopted and published.

Note: The standard has been ratified and published as 4.3.77.

Mr. Lander noted his belief that 4.3.77 should be deleted as it was difficult if not impossible to implement via EDI. Various scenarios for the usage of the data elements were discussed. A primary issue complicating the usage discussion was the fact that this standard would only apply to those pipelines who support filling in the Upstream/Downstream Identifier based upon the sender filling in the Upstream/Downstream Contract Identifier data element.

Mr. Lander noted that the intent of the standard could potentially be accomplished by addition of an MA data element (supported by those TSPs who do the automatic fill-in on their EBBs) which then indicates that the Upstream/Downstream ID is to be filled-in by the TSP.

There was apparent general agreement that this standard perhaps went a little too far and Mr. Lander proposed (for next time) that consideration be given to deleting standard no. 4.3.77.

### **Business Practices Subcommittee** (February 24, 2000)

This request was discussed at the January 20, 2000 meeting. It has been postponed until this meeting for vote. Reference BPS minutes of January 20, 2000 for additional detail.

Mr. Lander made the following motion which was seconded by Mr. Buccigross:

**Motion** BPS recommends that Standard No. 4.3.77 be deleted.

Mr. Lander explained his rationale. He believes that implementation of this standard would result in significant changes to the nomination dataset including major changes in the "current looping" structure related to upstream and downstream party and contract information.

He also noted that the requirement for providing upstream and downstream party information in the nomination has been a recognized business practice since the initial adoption of the GISB standards. The request to change this business practice for the limited case does not warrant the required changes to the dataset or the revamping of the business process.

There was additional discussion on any potential changes to the usage of the data elements in the nomination dataset. Mr. Keisler and others explained that removal of this standard (approving the recommendation to remove the standard) would result in the datasets remaining as they are. Implementing 4.3.77 (declining the motion to remove the standard) would result in significant changes to the nominations dataset and related business practices.

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Tennessee Gas Pipeline**

**Request No.: R98085**

**Action** The motion passed unanimously. See voting record for specifics.

**Sense of the Room:** (February 24, 2000) 11 In Favor 0 Opposed

## Annotations from EdmAS2.pdf

### Page 1

---

*Annotation 1; Label: Carl P Caldwell; Date: 4/6/2000 1:21:09 PM*

Proposed changes to section Executive Summary , subsection Open Standards Page 1, after the Security item

HTTP Transport for Secure EDI (a.k.a. IETF EDIINT AS2).

(after the sentence "The open standard technologies.....")

There are business benefits gained from adherence to "HTTP Transport for Secure EDI" such as :

- Allows potential to more readily, electronically trade with others (e.g., electric utilities, banks, suppliers, retail customers)
- Makes it more likely that packages can be purchased to replace custom written apps currently in place to support GISB EDM
- Strengthens the surety of receipt and error notification

HTTP Transport for Secure EDI (AS2) is an emerging standard, largely based on the original GISB EDM, that is being developed by the Internet Engineering Task Force, the Internet standards body. Adherence with a formal, international Internet standard, such as AS2 ensures that the specification will not change without due process and any changes that do occur will be the result of a broad consensus. Individual companies and entire industries are free to use as much or as little of AS2 as they see fit, providing the maximum flexibility to meet business needs.

### Page 3

---

*Annotation 1; Label: Carl P Caldwell; Date: 3/1/2000 7:18:56 PM*

Proposed changes to section Business Process and Practices, subsection Overview: Where Internet EDM Fits..... Page 1, at the end of second paragraph

In Version 1.5 of the GISB Standards, the technical specifications of the EDI/EDM method of communication have been modified to comply with a the broader "HTTP Transport for Secure EDI" standard being developed by the Internet Engineering Task force (IETF). These technical changes do not impact the underlying required business practices established by GISB. In addition, the security features of the EDI/EDM and batch FF/EDM communication method now includes mutually agreeable business practices to protect the sender of a document from non-repudiation and to digitally sign Error Notifications.

### Page 8

Proposed changes to section SENDING TRANSACTIONS, subsection Writing a Batch Browser

Page 8, replace the last bulleted paragraph on the page with the following:

The data field containing the GISB standard file has two extra identifiers: first the name of the file sent from the source computer, filename="c:\temp\smallnom.bin", and second a content type identifier on a

separate line. This line should always be constructed to reflect the content-type of the data being transmitted, in accordance with accepted Internet standards. If the data file contains clear text, X12 data, as shown in the above example, the content-type identifier follows the recommendations of RFC 1767, "MIME Encapsulation of EDI Data", and the "Content-Type:application/EDI-X12" is used. However, for security purposes it is recommended that all data be encrypted and digitally signed prior to transmission over the Internet. There are IETF standards for describing and packaging encrypted data files, most notably, "MIME Security with Pretty Good Privacy (PGP)", RFC 2015 and "MIME-based Secure EDI", RFC TBD.

When the sender of a file intends to use encryption and digital signature functions to secure the contents of a data file the file must be prepared in accordance with the above mentioned IETF standards. ASC X12 data must first be prepared in canonical form as specified in RFC 1767. The ASC X12 data file would be concatenated with the MIME Content-type of application/EDI-X12 as the first line of the file.

For example below is a file before encryption:

```
Content-type: application/EDI-X12
ISA~00~ ~01~AAA6300300~14~1234567890000 ~14~2345678900000
... more data from the X12 file...
IEA~1~000003616
```

This file is encrypted, signed and packaged, which follows EDIINT AS1 and RFC 2015, which produces a file containing MIME headers and encrypted content as follows.

Below is the file after encryption:

```
Content-Type: multipart/encrypted; boundary=8760; protocol="application/pgp-encrypted"
```

```
--8760
Content-Type: application/pgp-encrypted
```

```
Version: 1
```

```
--8760
Content-Type: application/octet-stream
```

```

**Page 48**

*Annotation 1; Label: Carl P Caldwell; Date: 3/7/2000 8:42:50 PM*

Proposed changes to section RECEIVING TRANSACTIONS, subsection Writing the CGI Process

Page 13, replace the last paragraph on the page with the following:

Immediately after the CGI validates (as above), parses, and saves the data, the CGI should record the time and construct a gisb acknowledgement receipt described in the following section. This gisb acknowledgement receipt is usually sent from the CGI by writing to the standard output (stdout) of the CGI process. If using signed receipts, the receiving party must produce a digital signature of the gisb acknowledgement receipt and send both the gisb acknowledgement receipt and digital signature body parts within a multipart/signed MIME envelope.

*Annotation 1; Label: Carl P Caldwell; Date: 3/7/2000 8:43:35 PM*

Proposed changes to section URL/CGI Implementation Guidelines

Page 14, replace the first sentence in the paragraph starting with "Error Notifications" with the following:

Error notifications include errors that occur some time after the gisb acknowledgement receipt is sent (such as a file decryption error) as well as errors on the transactions.

---

**Page 50**

*Annotation 1; Label: Carl P Caldwell; Date: 3/7/2000 8:44:49 PM*

Proposed changes to section URL/CGI Implementation Guidelines, subsection Server Specifications

Page 15, replace the sentence starting with "The HTTP response must be enveloped" with the following:

The gisb acknowledgement receipt must be enveloped in a multipart/report, as specified in EDIINT AS2 following the rules for Generalized Receipts. If signed receipts are used, the gisb acknowledgement receipt (including the multipart/report envelope) is digitally signed, producing a application/pgp-encrypted body part. Both the multipart/report (gisb acknowledgement receipt) and the application/pgp-signature body parts are placed in a multipart/signed envelope and the entire package is returned to the sender.

*Annotation 2; Label: Carl P Caldwell; Date: 2/29/2000 8:50:53 AM*

Proposed changes to section URL/CGI Implementation Guidelines, subsection Server Specifications

Page 15, remove the sentence "The HTTP response must be no more than 2048 characters"

*Annotation 3; Label: Carl P Caldwell; Date: 3/7/2000 8:45:24 PM*

The HTTP response must be no more than 2048 characters.

*Annotation 2; Label: Carl P Caldwell; Date: 2/29/2000 8:56:13 AM*

Proposed changes to section Sending Error Notification Transactions, subsection Error Notification Data Elements

Page 22, replace the paragraph starting with “If an HTML response is given” with the following:

If an error notification is given, a GISB Error Notification contains two body parts nested within a multipart/report outer envelope. The first body part contains human readable content in HTML. The second body part contains machine readable content in HTML. Additionally, consenting trading partners can mutually agree to digitally sign error notifications. If digital signatures are used, the multipart/report containing the GISB Error Notification is used to create a digital signature body part, identified by a content-type of application/pgp-signature. Both the multipart/report GISB Error Notification and application/pgp-encrypted digital signature body parts are combined in a multipart/signed envelope.

*Annotation 3; Label: Carl P Caldwell; Date: 3/7/2000 8:49:40 PM*

The entire error notification must be no more than 2048 characters.

**Page 58**

**TO: GISB Contracts Subcommittee**

**FROM: GISB EDM Subcommittee**

**Date: March 23, 2000**

**Re: AS2 affect on the TPA**

As a result of processing Request No. R99035 from Group 8760 the EDM subcommittee is recommending the adoption of certain changes in order to address the business needs for privacy, authentication, integrity and non-repudiation of Origin and Receipt as specified in "HTTP Transport for Secure EDI" (a.k.a. EDIINT AS2). The EDIINT AS2 modifications to the GISB EDM protocol allow trading partners to mutually agree to implement signed receipts. To implement signed receipts the receiving party must digitally sign the gisb-acknowledgement-receipt and encapsulate the gisb-acknowledgement-receipt and digital signature body parts within a MIME envelope with a content-type of application/pgp-signature. Additionally the GISB EDM recommended changes permit trading partners to utilize digitally signed error notifications, if both parties mutually agree to do so. If digital signatures are used, the multipart/report containing the gisb error notification is used to create a digital signature body part, identified by a content-type of application/pgp-signature. Both the multipart/report gisb error notification and application/pgp-encrypted digital signature body parts are combined in a multipart/signed envelope.

When reviewing these proposed changes the EDM subcommittee raised the issue of whether the adoption of EDIINT AS2 requires modification to the Trading Partner Agreement, GISB Standard No. 6.3.3 (TPA). The following areas of the TPA may need to be revised to permit the trading partners to specify their mutual agreement to the use of signed receipts and the specific implementation of such use:

1. Review of terminology throughout the TPA (for example HTTP response, time-c, etc.)
2. Section 2.2 Digital Signature Verification and Decryption
3. Section 2.3 Functional Acknowledgement and Response Document
4. Exhibit (Transaction Set Exhibit), Section 4.

The above list is not intended to be an inclusive list.

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Group 8760**

**Request No.: R99035**

**4. SUPPORTING DOCUMENTATION**

**a. Description of Request:**

Review and recommend changes to the existing body of EDM standards to support standards convergence across other standards setting groups, such as AIAG, UIG, and EDI-INT.

**b. Description of Recommendation:**

**Electronic Delivery Mechanism Subcommittee**

Motion: The AS2 convergence work paper will be sent to the FTTF for their meeting on February 16<sup>th</sup>. The FTTF will review the work paper to verify the technical specification and examples. In addition, FTTF should review the work paper to verify that the changes do not require any mandatory changes to business practices between trading partners.

**Sense of the Room:**      **1/21/2000**                      16 In Favor                      0 Opposed

**Future Technology Taskforce**

Motion: Based of FTTF's review, version 2.1 (will become version 2.2 with changes), the AS2 document is technically acceptable.

**Sense of the Room:**      **2/16/2000**                      15 In Favor                      0 Opposed

**Electronic Delivery Mechanism Subcommittee**

Motion: Adopt the AS2 work paper, as posted and with above changes, as a the EDM Subcommittee recommendation to the Executive Committee as to support standards convergence with the Internet Engineering Taskforce EDIINT standard AS2.

**Sense of the Room:**      **3/23/2000**                      10 In Favor                      0 Opposed

Motion: Adopt the instruction, as modified, to the Contracts Subcommittee regarding the changes which may be needed in the GISB standard Trading partner Agreement.

**Sense of the Room:**      **3/23/2000**                      11 In Favor                      0 Opposed

**c. Business Purpose:**

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Group 8760**

**Request No.: R99035**

There are business benefits gained from adherence to "HTTP Transport for Secure EDI" (a.k.a. IETF EDIINT AS2) such as allowing potential to more readily, electronically trade with others (e.g., electric utilities, banks, suppliers, retail customers), making it more likely that packages can be purchased to replace custom written apps currently in place to support GISB EDM and strengthening the surety of receipt and error notification

HTTP Transport for Secure EDI (AS2) is an emerging standard, largely based on the original GISB EDM, that is being developed by the Internet Engineering Task Force, the Internet standards body. Adherence with a formal, international Internet standard, such as AS2 ensures that the specification will not change without due process and any changes that do occur will be the result of a broad consensus. Individual companies and entire industries are free to use as much or as little of AS2 as they see fit, providing the maximum flexibility to meet business needs.

**d. Commentary/Rationale of Subcommittee(s)/Task Force(s):**

The technical specifications of the EDI/EDM method of communication have been modified to comply with a the broader "HTTP Transport for Secure EDI" standard being developed by the Internet Engineering Task force (IETF). These technical changes do not impact the underlying required business practices established by GISB. In addition, the security features of the EDI/EDM and batch FF/EDM communication method now includes mutually agreeable business practices to protect the sender of a document from non-repudiation and to digitally sign Error Notifications.

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Williams Gas Pipeline**

**Request No.: R99050**

**1. Recommended Action:**

- Accept as requested
- Accept as modified below
- Decline

**Effect of EC Vote to Accept Recommended Action:**

- Change to Existing Practice
- Status Quo

**2. TYPE OF MAINTENANCE**

**Per Request:**

- Initiation
- Modification
- Interpretation
- Withdrawal
  
- Principle (x.1.z)
- Definition (x.2.z)
- Business Practice Standard (x.3.z)
- Document (x.4.z)
- Data Element (x.4.z)
- Code Value (x.4.z)
- X12 Implementation Guide
- Business Process Documentation

**Per Recommendation:**

- Initiation
- Modification
- Interpretation
- Withdrawal
  
- Principle (x.1.z)
- Definition (x.2.z)
- Business Practice Standard (x.3.z)
- Document (x.4.z)
- Data Element (x.4.z)
- Code Value (x.4.z)
- X12 Implementation Guide
- Business Process Documentation

**3. RECOMMENDATION**

**SUMMARY:** \* Modify the definition of the data element Tax Identification Code.

**DATA DICTIONARY** (for new documents and addition, modification or deletion of data elements)

**Document Name and No.:** Transportation/Sales Invoice (3.4.1)  
 Service Requester Level Charge/Allowance Invoice (3.4.4)

<b>Business Name (Abbreviation)</b>	<b>Definition</b>	<b>Model Data Group</b>	<b>EDI/ FF Usage</b>	<b>Condition</b>
Tax Identification Code (Tax ID Cd)	<u>Code assigned by a government to the Payee.</u> Code assigned by a government recognizing a business entity.	BEDG	SO *	For Invoice - determined by government reporting requirements.

\* Note that the usage of the Tax Identification Code was changed from BC to SO as a result of request R99051, which was approved by the GISB EC on April 13, 2000.

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Williams Gas Pipeline**

**Request No.: R99050**

**TECHNICAL CHANGE LOG** (all instructions to accomplish the recommendation)

**Document Name and No.:** Transportation/Sales Invoice (3.4.1)  
 Service Requester Level Charge/Allowance Invoice (3.4.4)

<b>Description of Change:</b>
<b>G811TSIN - Transportation/Sales Invoice (3.4.1)</b>
<b>Data Element Xref to X12</b>
Header REF segment: delete line for data element Tax Identification Code
Header N1 segments: break the four N1 segments (currently all in one invisible row in the table) into separate invisible rows in the table
below the N1 segment for data element Payee (in the same invisible row in the table), add a REF segment, usage SO, for data element Tax Identification Code
move the segments for N3 Remittance Address, N4 Remittance Address, and REF Electronic Funds Transfer Address into the same invisible row in the table as N1 Remit to Party and delete the resulting empty rows
<b>X12 Mapping</b>
Header REF segment (position 050): REF01: delete element level note; add code value 11; REF02: delete element level note about referring to the table; delete element name "Tax Identification Code"; resulting REF02 element note should read "Account Number"
Header REF segment within N1 loop (position 140): REF01: add code value "TJ"; add the following code value note to code value "TJ": "For GISB, this code value may only be used in the Payee N1 loop (N101 = 'PE')"; REF01: add the following code value note to code value "EM": "For GISB, this code value may only be used in the Remit to Party N1 loop (N101 = 'RI')"; REF02: add data element name ", Tax Identification Code"
<b>Transaction Set Tables</b>
"REF Segments (Heading)" table: delete entire table
<b>G811SRCA - Service Requester Level Charge/Allowance Invoice (3.4.4)</b>
<b>Data Element Xref to X12</b>
Header REF segment: delete line for data element Tax Identification Code
Header N1 segments: break the four N1 segments (currently all in one invisible row in the table) into separate invisible rows in the table
below the N1 segment for data element Payee (in the same invisible row in the table), add a REF segment, usage SO, for data element Tax Identification Code
move the segments for N3 Remittance Address, N4 Remittance Address, and REF Electronic Funds Transfer Address into the same invisible row in the table as N1 Remit to Party and delete the resulting empty rows
<b>X12 Mapping</b>
Header REF segment (position 050): REF01: delete element level note; add code value 11; REF02: delete element level note about referring to the table; delete element name "Tax Identification Code"; resulting REF02 element note should read "Account Number"
Header REF segment within N1 loop (position 140): REF01: add code value "TJ"; add the following code value note to code value "TJ": "For GISB, this code value may only be used in the Payee N1 loop (N101 = 'PE')"; REF01: add the following code value note to code value "EM": "For GISB, this code value may only be used in the Remit to Party N1 loop (N101 = 'RI')"; REF02: add data element name ", Tax Identification Code"
<b>Transaction Set Tables</b>
"REF Segments (Heading)" table: delete entire table

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Williams Gas Pipeline**

**Request No.: R99050**

**Cleanup items submitted with this recommendation**

**G811TSIN - Transportation/Sales Invoice (3.4.1)**

**X12 Mapping**

Header N3 segment (position 120): add the following sentence to the end of the existing segment note: "It may only be sent in the Remit to Party N1 loop (N101 = 'RI')."

Header N4 segment (position 130): add the following sentence to the end of the existing segment note: "It may only be sent in the Remit to Party N1 loop (N101 = 'RI')."

**G811SRCA - Service Requester Level Charge/Allowance Invoice (3.4.4)**

**X12 Mapping**

Header N3 segment (position 120): add the following sentence to the end of the existing segment note: "It may only be sent in the Remit to Party N1 loop (N101 = 'RI')."

Header N4 segment (position 130): add the following sentence to the end of the existing segment note: "It may only be sent in the Remit to Party N1 loop (N101 = 'RI')."

**4. SUPPORTING DOCUMENTATION**

**a. Description of Request:**

Williams Gas Pipeline (WGP) on behalf of the ANSI Compliance Team requests that the definition of the data element Tax Identification Code in the Transportation/Sales Invoice (3.4.1) be changed to reflect that the code is assigned to the Remit to Party. The current definition is:

“Code assigned by government recognizing a business entity.”

The proposed revised definition is:

“The tax identification code assigned by a government to the Remit to Party.”

**b. Description of Recommendation:**

**Information Requirements Subcommittee**

**Discussion:** During the processing of this request at February’s IR meeting, some confusion developed as to whether the Tax Identification Code should be a “code assigned by a government to the Remit to Party” or a “code assigned by a government to the Payee”. The data element Tax Identification Code is utilized in the Transportation / Sales Invoice and the Service Requester Level Charge/Allowance Invoice.

**IR Implementation**

The definition for the data element Tax Identification Code should be a “Code assigned by a government to the Payee”.

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Williams Gas Pipeline**

**Request No.: R99050**

MOTION: Modify the definition of the data element Tax Identification Code as documented above. The data element Tax Identification Code is utilized in the Transportation / Sales Invoice and the Service Requester Level Charge/Allowance Invoice.

**Sense of the Room:** March 28-29, 2000      6 In Favor      0 Opposed

**Technical Subcommittee**

Changes were made to the mapping to implement the new definition of the Tax Identification Code data element. Changes were also made to the Data Element Cross Reference to X12 and notes were added to the X12 Mapping to better represent the looping structure of the data elements as related to the parties in the transaction.

**Sense of the Room:** April 20, 2000      3 In Favor      0 Opposed

**c. Business Purpose:**

Per the request: When this request is satisfied, there will be a clearer definition of the subject data element in the Transportation/Sales Invoice.

**d. Commentary/Rationale of Subcommittee(s)/Task Force(s):**

## **FTTF**

### **Redlined Changes to Minimums and Versions from 1.4 to 1.5**

- **Page 20 - GISB EDM Manual 1.4 (Specified TCP Ports)**

#### **TCP Communications**

GISB Principle 4.1.37 and GISB Standard 4.3.70 restrict the TCP ports used as a standard for EDM communications. The usage of GISB standard ports may require modifications in the client-side firewall to allow for communications with the various service providers' EDM\* implementations. Upon request, the TSP should indicate to their trading partners which specific TCP ports they will require to be opened to conduct electronic communication.

##### Allowable TCP Ports (not UDP ports)

HTTP 80, 5713, 6112, 6304, 6874, 7403

SSL 443

ICA® 1494

RMI(Java® ) 1099-1100

Java® Telnet 31415

TCP Optional 8001-8020\*\*

##### Allowable UDP Ports (not TCP ports)

Secure ICA 1604

There are other technologies available that would require additional ports to be opened, such as FTP, Telnet, and SMTP. If and when GISB approves such technologies, FTTF will modify this list of allowable ports accordingly. The client-side firewall implementation and client browser settings should permit the downloading and installation of GISB approved plug-ins and modules. Please refer to the GISB defined Minimum Technical Characteristics for Accessing Customer Activities Web Sites for the listing of GISB approved plug-ins and modules.

These guidelines will be reviewed and updated by the Future Technology Task Force, at a minimum, by the spring of each year and presented to the GISB Executive Committee for adoption by the June meeting of that group.

\*All GISB standard Internet communications

\*\*The reservation of 20 optional ports was to provide room for implementations such as DCE, IIOP, and load balancing implementations. TSPs should endeavor to minimize the usage of these ports.

4.3.59 Providers of Customer Activities Web sites should ensure that the site operates within the guidelines of the "Technical Characteristics of the Client Workstation" described in the Appendix of the Electronic Delivery Mechanism Related Standards Manual. This appendix, listing examples of hardware and software configurations that providers should meet, should be reviewed and updated by the Future Technology Task Force, at a minimum, by the spring of each year and presented to the GISB Executive Committee for adoption by the June meeting of that committee.

- **Page 63 - GISB EDM Manual 1.4 (Specified HTTP Ports)**

## **FTTF**

### **Redlined Changes to Minimums and Versions from 1.4 to 1.5**

#### **Server Specifications**

The HTTP Server should be configured as port 80. If port 80 is not available, use one of the five recommended alternate ports: 5713, 6112, 6304, 6874, 7403.

- **Page 22, 68 - GISB EDM Manual 1.4 (PGP Version)**

#### **Security**

Though many decisions as to overall security measures are left to each trading partner and their environment, several security measures were established as standards to ensure a minimum level of confidence in conducting business over the Internet and to provide some uniformity in the implementation of security. Four primary security aspects were considered as vital in providing the level of protection of transactions needed for gas industry commerce: data privacy, data integrity, authentication, and non-repudiation. The FTTF found that these concerns are addressed by the use of encryption and digital signature capability of the Pretty Good Privacy (PGP) security application. Any process used for encryption and decryption compatible with PGP 2.6 (using keys generated with the RSA algorithm) meets the minimum standard to be applied to files transmitted over the Internet. To prevent unwanted intruders from connecting to the Web sites, basic authentication is the required standard. Additional issues such as firewall security are discussed in the standards, but are considered implementation issues to be addressed by each organization.

4.3.15 Trading partners should implement all security features (secure authentication, integrity, privacy, and non-repudiation) using a file-based approach via a commercially available implementation of PGP 2.6 or greater (or compatible with PGP 2.6). Trading partners should also implement basic authentication. This should be regarded as an interim solution since this technology is not an open standard. This technology supports all of the above security features while providing independence of choice of Web servers and browsers. Encryption keys should be self-certified and the means of exchange should be specified in the trading partner agreement.

- **Page 22, 68 - GISB EDM Manual 1.4 (HTTP & HTML Version)**

#### **HTTP**

The GISB EDM architecture is based on HTTP 1.0, and all implementations should be compatible with this version.

W3C WorldWide Web Consortium. All aspects of HTTP, HTML, and other Web-related topics are documented at:

<http://www.w3.org/pub/WWW/>

General information regarding HTTP with basic terminology included are documented at: <http://www.w3.org/pub/WWW/Protocols/HTTP/1.0/spec.html>

## FTTF

### Redlined Changes to Minimums and Versions from 1.4 to 1.5

Syntax information for multipart can be found in IETF RFC1341 section 7.2.

([www.ietf.org](http://www.ietf.org))

## HTML

Before April 24, 1998, the recommended standard from the WorldWide Web Consortium was HTML 3.2. The specification for this standard can be found at:

<http://www.w3.org/pub/WWW/TR/REC-html32.html>

Effective April 24, 1998, the WorldWide Web Consortium has made a recommendation for HTML 4.0. Information on HTML 4.0 may be found at <http://www.w3.org/TR/REC-html40/>.

**Informational Postings Web Site Developer Technical Characteristics**

User's environment supporting the above minimum characteristics should be able to access all GISB standardized features of Informational Postings Web Sites.

Any other Web technologies may be considered for use by the developer as long as they can be used by the client without requiring special actions including firewall rule changes, use of a specific browser, logons and downloads of special helper applications such as plug-ins, viewers or readers.
