

R98033

Gas Industry Standards Board
Request for Initiation of Standard for Electronic Business Transactions
or
Enhancement of an Existing GISB Standard for Electronic Business Transactions

Date of Request: September 25, 1998

1. Submitting Entity and Address:

ANR Pipeline Company
500 Renaissance Center
Detroit, Michigan 48243

2. Contact Person, Phone #, Fax # and E-mail Address:

Stephanie LeCureaux
Phone: 313-496-5204
FAX: 313-496-2227
E-mail: Stephanie.Lecureaux@coastal.com

3. Description of Proposed Standard or Enhancement:

Request for Pooling Quantity:

- To provide the Service Requester (i.e. pooler) with the ability to request pooling information for any specified time period. The request will allow the pooler to obtain the Scheduled Quantity for Poolers Documents (see below) with pooling information a.) for past periods, b.) for future periods or, c.) for retransmissions of current periods. This proposed standard uses the R96009B Workpaper as its basis.

In addition to the data elements used in R96009B, ANR requests that a new data element be added for contract. With the data elements requested in R96009B and the new contract data element, the pooler will be able to request one or all pooling contracts for a pooling location. The Request for Pooling Quantity transaction set should be implemented at the same time as the following changes to the Scheduled Quantity for Operator (Pooler) changes.

(Example of data elements and sample data attached)

Scheduled Quantity for Poolers:

- The transaction dataset requirements are based on the Scheduled Quantity for Operators (G865SQOP) transaction dataset.

1.) The data elements required for the pooling information are currently in G865SQOP, except the following:

- Receipt Rank
- Delivery Rank

2.) It is thought that the current G865SQOP dataset could be used for this purpose by adding a Pooling code value for BCA13 Purchase Order Type Code.
(Example of data elements and sample data attached)

4. Use of Proposed Standard or Enhancement:

To accommodate ANR's survey item No. 14 for Pool Market Summary, the Request for Scheduled Quantity for Operator (R96009B) and the Scheduled Quantity For Operator Transaction Sets may be used.

ANR's survey item No. 14 for Pool Market Summary:

The Pool Market Balance Summary: SR (pooler) needs to request a list of Pool Market information by pooling contract (includes the following criteria: by specific date and flow time, pooling contract, headstation location). The response by TSP includes the daily supply, pool market and longhaul volumes nominated for the pool. This data will allow SR (pooler) to determine pooling variances and balance pools prior to nomination. Supply detail includes upstream Contract ID, nominated volumes and ranks. Market detail includes longhaul Contract ID, nominated volume and ranks.

5. Description of Any Tangible or Intangible Benefits to the Use of the Proposed Standard or Enhancement:

Provides for determination of out of balance pools prior to start of nomination cycle.

6. Estimate of Incremental Specific Costs to Implement Proposed Standard or Enhancement.

None.

7. Description of Any Specific Legal or Other Considerations:

None.

8. If This Proposed Standard or Enhancement Is Not Tested yet, List Trading Partners Willing To Test Standard or Enhancement:

ANR is willing to undertake testing with any interested party.

9. If This Proposed Standard or Enhancement Is In Use, Who are the Trading Partners.

N/A.

ANR Pipeline Company

Request for Pooling Response Dataset
(Based on R96009B- Request for Scheduled Quantity - Operator)

Segment	Usage	Data Element	Sample Pooling Contract Info
Header: N1	M	Statement Recipient ID	121212121
N1	M	Preparer ID	006958581
Detail:	C	Confirmation Service Contract (Use this data element for Pooling contract, also)	11111
DTM	M	Beg Date	8/10/1998
	M	Beg Time	9:00
	M	End Date	8/11/1998
	M	End Time	9:00
N1	M	Location	103565 (SW Headstation)

Data requester (Statement Recipient ID) would be the “owner” of the pool. The above request elements allows the pooler to request one or all pooling contracts for a pooling location.

Segment and Usage information on the above data elements were extracted from the Scheduled Quantity for Operator transaction dataset for example only and may be revised by the Technical Subcommittee as needed.
