

R98066

Gas Industry Standards Board
Request for Initiation of a GISB Standard for Electronic Business Transactions
or
Enhancement of an Existing GISB Standard for Electronic Business Transactions

Date of Request: November 23, 1998

1. Submitting Entity & Address:

Texas Eastern Transmission Corporation
5400 Westheimer Court
Houston TX 77056

2. Contact Person, Phone #, Fax #, Electronic Mailing Address:

Cynthia Corcoran
Managing Counsel
(713)627-5262
(713)989-3190
ccorcora@duke-energy.com

Kim Van Pelt
Lead Systems Analyst
(713)627-5566
(713)627-4066
kvanpelt@duke-energy.com

3. Description of Proposed Standard or Enhancement:

Texas Eastern Transmission Corporation requests the addition of the attached code values to the list of valid code values for the Transaction Type data element in the **Pre-determined Allocation (2.4.1)** and **Allocation (2.4.3)**. This request is a companion request to R98027 which has been sent to the Information Requirements Subcommittee. It is in anticipation of the Transaction Type data element being added by the R96125A and R96131 recommendation, which is currently pending in Information Requirements.

4. Use of Proposed Standard or Enhancement (include how the standard will be used, documentation on the description of the proposed standard, any existing documentation of the proposed standard, and required communication protocols):

The addition of these transaction types will enable Texas Eastern to continue to support the existing No-Notice service provisions in Rate Schedules CDS and SCT of its tariff. This service was included in these Rate Schedules as a result of the Order 636 settlement with our customers and became available on June 1, 1993 to replicate the customers' bundled citygate sales standby service. Since these rate schedules provide for both firm and No-Notice service, a customer must have a way to identify which service he is using.

**Request for Initiation of a GISB Standard for Electronic Business Transactions
or
Enhancement of an Existing GISB Standard for Electronic Business Transactions**

The No-Notice Pre-Injection transaction type is used to identify those quantities for which the customer has been approved to inject quantities into the pipeline system in anticipation of an increase in demand and for which he will receive a credit against the Reservation component of his invoice.

The three transaction types for No-Notice Balancing are needed to enable the customer to identify whether a prior month or a current month No-Notice imbalance is being resolved, since the rate schedules provide for different timing and methods of imbalance resolution, depending on when the imbalance was created.

Texas Eastern is in the process of creating its interactive Web site and requests that this be processed as expeditiously as possible in order to facilitate electronic commerce via the Internet. These code values, although requested by Texas Eastern, could be applicable across the pipeline segment.

5. Description of Any Tangible or Intangible Benefits to the Use of the Proposed Standard or Enhancement:

6. Estimate of Incremental Specific Costs to Implement Proposed Standard or Enhancement:

7. Description of Any Specific Legal or Other Considerations:

8. If This Proposed Standard or Enhancement Is Not Tested Yet, List Trading Partners Willing to Test Standard or Enhancement (Corporations and contacts):

9. If This Proposed Standard or Enhancement Is In Use, Who are the Trading Partners :

10. Attachments (such as: further detailed proposals, transaction data descriptions, information flows, implementation guides, business process descriptions, examples of ASC ANSI X12 mapped transactions):

See Attached Code Values lists

**Request for Initiation of a GISB Standard for Electronic Business Transactions
or
Enhancement of an Existing GISB Standard for Electronic Business Transactions**

Pre-determined Allocation (2.4.1)

Code Value Description	Code Value Definition
No-Notice Service	Identifies a request to initiate no-notice service.
No-Notice Pre-Injection	Identifies a request to schedule additional receipts into the pipeline in anticipation of an increase in demand.
No-Notice Balancing	Used to differentiate between nominations placed to correct current month no-notice imbalances and nominations placed to correct other types of current month imbalances.
No-Notice Due Transportation Service Provider Balancing	Identifies quantities nominated to resolve prior month no-notice imbalances owed to the Transportation Service Provider.
No-Notice Due Service Requester Balancing	Identifies quantities nominated to resolve prior month no-notice imbalances owed to the Service Requester.

Allocation (2.4.3)

Code Value Description	Code Value Definition
No-Notice Service	Identifies a request to initiate no-notice service.
No-Notice Pre-Injection	Identifies a request to schedule additional receipts into the pipeline in anticipation of an increase in demand.
No-Notice Balancing	Used to differentiate between nominations placed to correct current month no-notice imbalances and nominations placed to correct other types of current month imbalances.
No-Notice Due Transportation Service Provider Balancing	Identifies quantities nominated to resolve prior month no-notice imbalances owed to the Transportation Service Provider.
No-Notice Due Service Requester Balancing	Identifies quantities nominated to resolve prior month no-notice imbalances owed to the Service Requester.
