**3. Description of Proposed Standard or Enhancement:**

Texas Eastern Transmission Corporation requests the addition of the attached code values to the list of value code values for the Transaction Type data element in the ***Pre-determined Allocation (2.4.1)*** and ***Allocation (2.4.3)***. This request is a companion request to R98028 which has been sent to the Information Requirements Subcommittee. It is in anticipation of the Transaction Type data element being added by the R96125A and R96131 recommendation, which is currently pending in Information Requirements.

**4. Use of Proposed Standard or Enhancement (include how the standard will be used, documentation on the description of the proposed standard, any existing documentation of the proposed standard, and required communication protocols):**

The addition of these transaction types will enable the Texas Eastern to continue to support the existing Suspense Gas provision in the General Terms and Conditions of its tariff. These transaction types will allow Texas Eastern to monitor the Service Requester's actions related to the Suspense Gas claim and to apply the tariff provisions correctly, beginning with Nominations and ending with Invoicing.

Texas Eastern is in the process of creating its interactive Web site and requests that this be processed as expeditiously as possible in order to facilitate electronic commerce via the Internet. These code values, although requested by Texas Eastern, could be applicable across the pipeline segment.
